

ECE 492-45 Project Report Submission Guide

You must use IEEE Transactions template for writing your team's project report. The report is expected to be a *concise* writeup consisting of results and discussions of your findings; include appropriate plots as applicable. No need to include detailed background reviews that mainly repeat the techniques taught in lectures, unless you are using any approaches that are not covered in lectures.

Rubric for the report:

1. Description and justification of the system design and proposed algorithms.
2. Presentation of experimental results and critical evaluations/discussions.
3. Quality of writing (clarity, organization, references, proper use of figures/tables).

Please upload your team's report to the submission system by one of the team members by 11:59 pm on 12/18/2019.
